

# What's New?

## VIDEOS

Our video recordings now have a max record time of up to 4 minutes on any button! Record directly within our apps, or upload from your camera roll. We extended our record time to capture full songs, video clips from movies, or favorite YouTube videos, per request of a very special 18 year old of ours who persuaded us. We've had a blast uploading content to her iPad to watch and listen to anytime she wants, conveniently, right before their internet went out for two weeks!

## MESSAGE WINDOW

We have enhanced our Message Window feature. Prior to our last update, our Message Window would not allow duplicating selections. This helped decrease stims from the populations we primarily worked with. As shifts in therapy have occurred, especially post-pandemic, we are noticing an increasing need for reading and spelling support. We unlocked our Message Window to allow 2 duplicating selections at a time for spelling support.

## AUDIO RECORDINGS

Our new audio recordings feature has been a ton of fun to use in therapy these past few weeks. It's quite a game changer. We love how our little ones enjoy hearing the voices of other little ones they don't even know. They are very drawn to the audio recordings. Some audio recordings are for speech help and some are just for fun. But all carry meaning, emotion, and support. [Read more...](#)

## FEATURED BOARD: WORK PROGRAM VOCABULARY

Whether it's to convey to others what they did during their work day, ask for a needed item in the workplace, indicate a problem with a piece of equipment, or tell a future employer about their work experience, using the proper names of items used in the workplace is a valuable skill. The WORK PROGRAM VOCABULARY board provides a fun, visual way to practice naming workplace items and equipment. Responses can be vocalized, signed, typed, or written. The vocabulary board shown here is part of a JOB SKILLS board set originally designed for students in a clerical services work program designed for students age 18 - 22. Eight items can be presented on each page. Additional pages can be added by going into the edit menu (holding the settings gear for 5 seconds) and selecting "add page." If a smaller field of items (ex. 3 items) is preferred, the HIDE/SHOW feature of our BRIDGE Communication apps can be used to darken tiles as needed. The BRIDGE Communication Builder app was used to create this board. As with all BRIDGE Communication app boards, this WORK PROGRAM VOCABULARY board can be easily customized to practice of vocabulary in any area and level. Vocabulary practice and review can be done independently or with parents, siblings, caregivers, paraprofessionals, job coaches, teachers, and SLPs in 1:1, small group, or whole group settings.
